

Southeast Alternative Fuel Corridor Convening

Monte McLeod
Palmetto Propane

Who We Are

Founded in 2009, Alliance AutoGas offers the only complete program to convert, maintain, and support autogas fleets.

Alliance AutoGas:

- Provides the vehicle conversion technology and has certified installers do the installations
- Builds the autogas refueling infrastructure and aligns the customer with surrounding refueling sites, if applicable
- Seamlessly integrates your autogas station with your fuel management system, or provides you with our fuel management technology
- Provides training on your autogas system, maintenance, proper refueling and safety for your fleet, and more
- Ongoing support to keep your vehicles on the road, including our industry-leading 5-year, 100,000-mile warranty on Plug-and-Play systems

Office: 803-687-0134

Autogas Infrastructure

- Scalable for public or private fleets
- Small footprint
- Low cost compared to other alternative fuels
 - \$20k to \$225k
- Alliance AutoGas refueling infrastructure utilizes an Ultra-low Emissions Quick Connect Nozzle. The nozzle:
 - Has a similar refueling process to a gasoline nozzle
 - Is safer to use than a gasoline nozzle
 - Has a comparable filling time to a gasoline nozzle

Opportunities and Challenges

Opportunities:

- Develop Infrastructure to promote Alternative Fuel Usage
 - Chicken/Egg
- Make Alternative Fuels viable for Fleet adoption through Alt Fuel Corridors and infrastructure development
- Fit the fuel to the vehicle
 - No Silver bullet
 - Multifuel opportunities within fleets

Challenges

- Create Alliances among competing alternative fuels
- Develop multifuel projects
 - Shared Real Estate
 - Joint project development
 - Shared funding
- Available Grants and Funding
